

Balanced harvest vs Compenstated harvest :

Using Ecosystemic models to assess effects of fishing scenarios on ecosystems structure and functionning

Ilan PEREZ

Supervised by

Didier GASCUEL, Jennifer REHREN et Pierre-Yves Hernvann

UMR
ESE

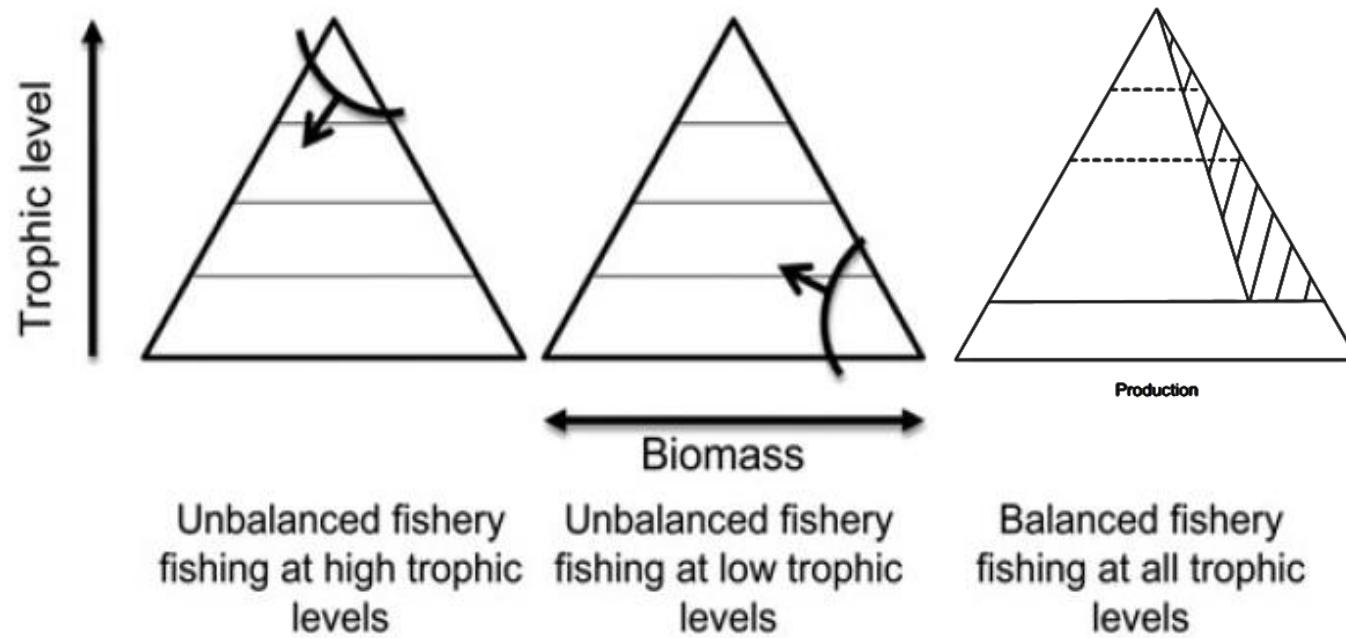

CONTEXT

OBJECTIVES

METHODS

QUESTIONS

Kolding and van Zwieten (2011) and Bundy et al (2005)

CONTEXT

OBJECTIVES

METHODS

QUESTIONS

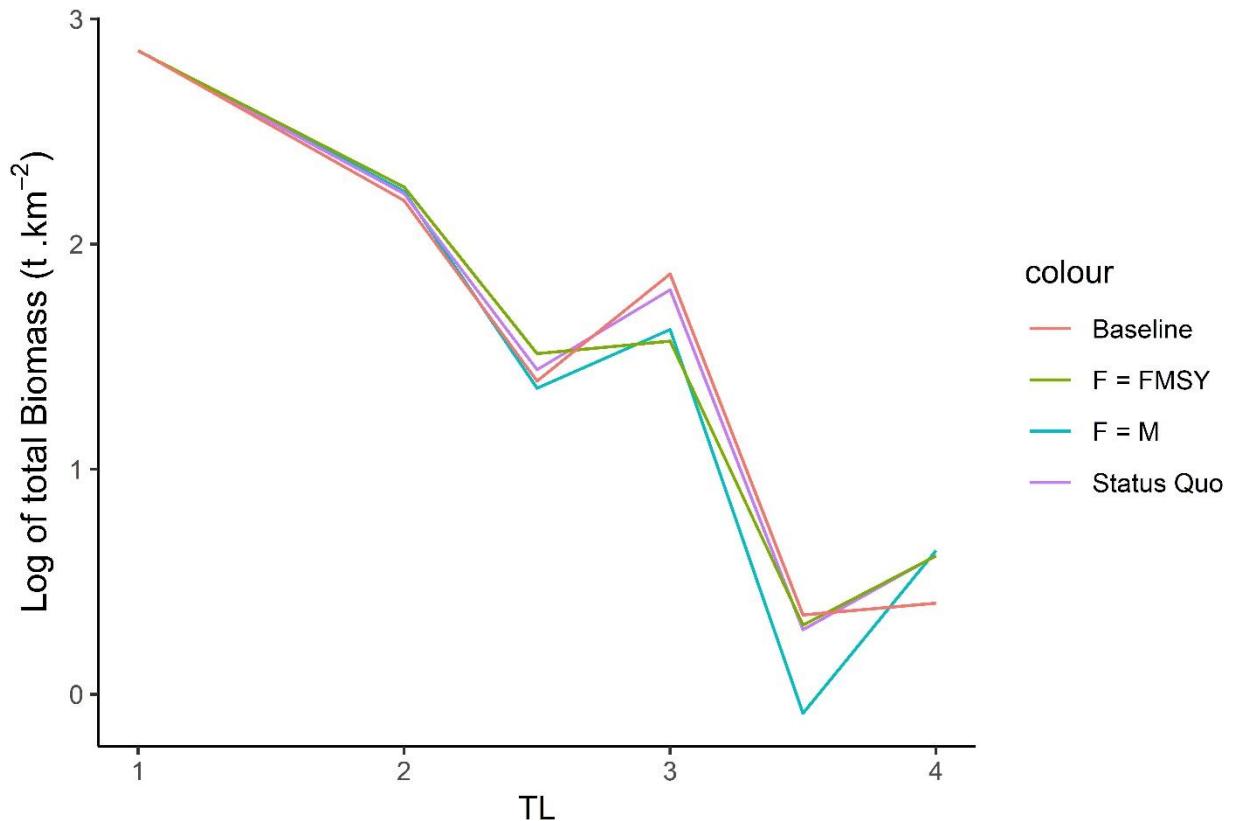

- Assess the effects of BH on Real Ecosystems
- Estimation of the feasibility of implementing BH in fisheries policy
- Does a BH scenario lead to a balanced ecosystem ?
- Compare multiple BH scenarios with other scenarios

CONTEXT

OBJECTIVES

METHODS

QUESTIONS

Plusieurs cas d'étude :

-Mauritanie

-Guinée ??

-Mer Celtique

(waiting for you PY)

Plusieurs Scenarios F:

- Status quo

-BH : $F = c * \Pi / Bi$

-FMSY pour tous

-Compensated Harvest....

Plusieurs Range d'espèces :

- « Actuellement » exploitées

-Potentiellement exploitable

-Tout le monde sauf < 1g

-Tout le monde, du zoo aux top pred

CONTEXT

OBJECTIVES

METHODS

QUESTIONS

- Fleets implementation for BH scenario
- F implementation : what P/B is the one to choose ?
